

## **Our history**

A story made of creativity, ingenuity, passion, innovation, evolution, which began as a game with pigeon nests sold under the house, which reached the digital economy.

The story of a company that grows by putting the customer and the needs of friends in the leg first.

## **The origins**

The company was founded in the 1980s by the creativity, ingenuity and passion for mechanics of Enzo Bonacci born in 1947. Taking on the challenge launched by a friend, a pigeon breeder, to design a mold to be able to make clay nests By hand, Enzo invented a real machine, a one-of-a-kind prototype, that automatically made nests for pigeons at a cost considerably less than the market price. His unstoppable creativity leads him to fuse his passion for "Lancia" cars into the designed machinery, driving the mechanism precisely with a disused steering wheel from his dream car.

Shortly after, the first sales of nests arrive, in the store below the agricultural equipment house, owned by his wife Claudia Ferranti.

The desire to innovate pushes the founder to create, from his own design and always according to the needs of his breeder friends, iron cages where to introduce the nests.

Thus, he began to look around, attending the first fairs in the sector with the aim of innovating and improving existing products; the business impulse had already begun, he went on to build cages for chickens, quail, rabbits, for all the poultry that were raised in the area.

Towards the end of the 1980s, the business expanded, also targeting the pet sector and the first boxes, fences, kennels for dogs and cats with an exclusive design and excellent quality characteristics were born. In a short time, the company became a point of reference not only for private animal lovers, but also for dog and cat lovers, for animal protection agencies, for public safety.

## **Generational change**

Michele Bonacci, son of the founder Enzo, in 2000 introduces the company in the world of the digital economy, offering customers the possibility, through the e-commerce site and various digital media, to have the greatest amount of information and images about the products. , buy comfortably from home and receive the merchandise at your home. Based on the Italian experience, the expansion abroad began, opening the borders also to customers from all over Europe.

In 2019 the cultural revolution begins, investment is made in Research and Development and in the best customer service, the company becomes an srl, the new logo is born, new products are born to offer customers better solutions for animal welfare.

## **What we do, how we do it and the quality**

The Ferranti brand has been a leader in the production of equipment for animals since 1980. The company designs and manufactures boxes for dogs and cats, kennels and enclosures for dogs, chicken coops, aviaries and rabbit hutches with passion and competence, offering innovative, versatile and long-lasting solutions. . All the products are modular, practical and functional, they adapt to all kinds of needs and can also be made to measure. Every detail is designed to offer comfort and safety to animals.

The structures are handmade by expert and competent personnel with exclusively Italian materials of the highest quality.

The choice of materials falls solely on excellence, such as the insulating panels made of 100% polyurethane; galvanized sheet and painted with protective film; thick and resistant iron; the electro-welded mesh, the hardware such as hinges, hinges, bolts are highly durable over time; The wood is marine plywood suitable for exteriors, treated with a non-toxic and washable impregnant used in the nautical sector.

The manufacturing processes also reflect the best artisan practices carried out with technologically advanced machinery for the processing, welding and profiling of iron: stirrup machines, shapers, bar and profile cutters for metal carpentry, post assembly machines, welding machines and punching machines. , which allow us to respond to the specific needs of the client. Even the galvanizing, the process that protects iron over time from weathering, rust and aggressive cleaning products, is carried out exclusively in Italy by the best experts in the sector.

## **Who are our clients**

Ferranti srl addresses both private animal lovers and professional dog and cat lovers, animal protection organizations, public safety, creating structures suited to the needs of small and large breeders and poultry farmers. . The experience in the sector allows the company to offer the best solutions and adapt and personalize the constructions to guarantee maximum usability even with customized processes.

Ferranti srl's 40 years of experience and continuous innovation have allowed it to perfect a technical level that allows it to offer customers excellent value for money.

Since 2000, Ferranti srl has also sold online throughout Italy and abroad through national and international couriers. The customer can buy comfortably from home using various forms of payment and receive the desired products at home, by appointment.

A large showroom at the company's headquarters is open to the public for a better viewing and selection of the product, with the possibility of immediate purchase.

## Our products

We produce structures for various types of animals, both domestic and yard and breeding, they are dedicated to dogs, cats, chickens, hens, goats, pigs, birds, rabbits and pests. Our facilities are also manufactured for the specific needs of veterinarians, hairdressers, breeders, veterinary health services, allocating to this category structures also tailored to their needs.

### Dog products:

#### dog crate

Our company is specialized in the design and construction of boxes for dogs, individual fences for dogs or modular fences for kennels or kennels, shelters or kennels of high quality standards. We create professional, safe and versatile multifunctional systems, shed boxes, warehouse boxes, corridors, prefabricated buildings, environmentally friendly housing solutions for various types of animals. Our products, all handmade, are treated in detail, made with high quality Italian materials and according to excellent manufacturing techniques and in constant innovation. This allows us to offer a wide variety of products that are safe, durable, versatile, easy to wash and well insulated, built to ensure the highest levels of quality and comfort. We are specialized in online sales to individuals, but we also collaborate with kennels, breeders, public and private entities and associations, town halls, dog and animal breeding shops, canine, health and veterinary centres. All of our products are easy to assemble, supplied with instructions and the necessary hardware. Our insulating structures are made with insulating panels, formed by rigid polyurethane foam injected between two sheets of hot-dip galvanized and pre-painted steel, framed with sheet metal profiles. Thanks to this solution, we achieve structures with a high insulation coefficient, thus maintaining the ideal temperatures for the dog both in winter and in summer. The open parts are made with hot-dip galvanized steel mesh panels, 0.39 wire of 5 x 5 threads or with panels of galvanized steel bars with a diameter of 1.2 cm and a distance of 6.5. The high quality of our materials guarantees the durability of the products, excellent resistance to weathering and to washing and disinfection operations. The interior platform of our boxes and sheds is built in marine plywood, it rises from the ground and guarantees comfort and total isolation from humidity.

### **Kennels**

The kennel is a product that must be chosen carefully, as it is the place where our faithful friend takes shelter from the cold, heat and inclement weather. Choose the features you want from our models, all also suitable for outdoor use: a comfortable shed made of 1.5 cm thick marine plywood panels treated with a protective impregnating agent and insulated roof; an insulated shed, the size you prefer, resistant, non-toxic, easily washable, well insulated, made with 3.5 cm thick insulating panels. In all our kennels, the internal platforms are raised and made of washable marine plywood and the entrance is made of hot-dip galvanized and painted anti-bite sheet metal. All of our products are easy to assemble, supplied with instructions and the necessary hardware. We also make custom products.

### **Panels for fences and boxes**

With our panels it is possible to make custom fences for dogs or other animals, dividing panels and retaining fences of any shape and size, made with 5 x 5 cm mesh, 0.39 cm wire or 1.2 cm bars. diameter. and distance of 6.5.

We also manufacture lighter and cheaper panels and doors, ideal for chicken coops, cat cages, aviaries and cages for small animals, made of galvanized mesh 2.5 x 2.5 wire 0.20 cm or mesh 1.9 x 1. , 9 threads of 0.14 cm riveted on galvanized tubular frames.

Our panels are supplied with anti-corrosion treatment, made by hot galvanizing by total immersion in a molten zinc bath. They are fixed to each other with screw and nut (supplied in the package) and to the ground with plugs. The fences are modular, so you can implement and complete them at any time. We offer multiple solutions that are well suited to any type of dog and environment. Also available panels for puppies or custom panels in mesh or insulation. All of our products are easy to assemble, supplied with instructions and the necessary hardware.

### Accessories for dog lovers

We have a wide range of accessories for dog lovers: from carriers to cradles, through anti-tip feeders, rotating stainless steel feeders and drinkers, feeders, birth cages in 1.5 cm thick marine plywood and in panels insulators with anti-crushing edge For protection. for puppies, wooden beds with an insulated bottom and raised from the ground with plastic legs, edged with anti-bite sheet metal profiles, platforms with steel legs that completely raise the kennel, anti-bark device to be programmed according to your needs: economical, functional and safe, prevents the dog from barking naturally. All our accessories are suitable for both individual boxes and large farms. We can also manufacture bespoke cribs, platforms and delivery boxes.

### Cat products

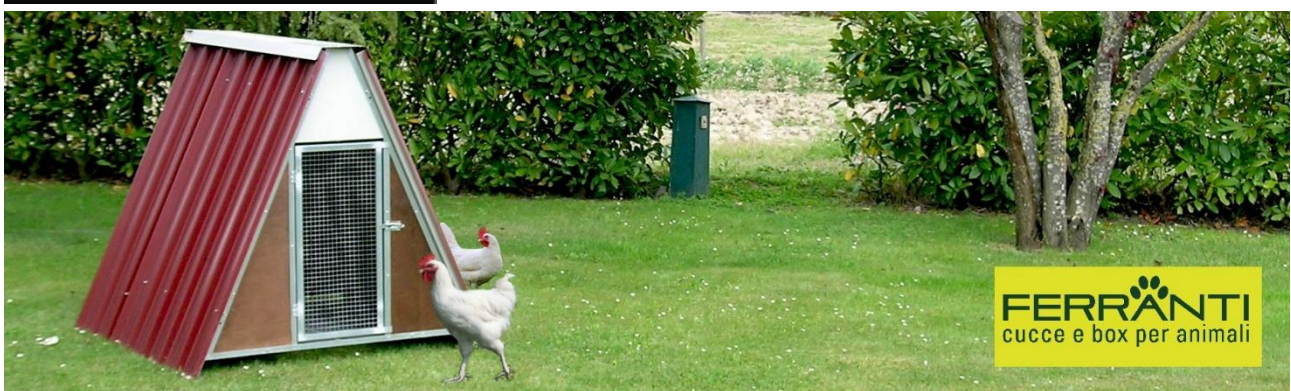

We have mesh cages for stackable cats and outdoor boxes that can be expanded at will. We can also make custom structures.

### **Products for hens and chickens**

We produce a wide range of houses for laying hens, hens, chicks, capons, turkeys, geese, ducks and other birds, available both in sheet metal and insulated panels. Our chicken coops are suitable for outdoors, designed to last over time and complete with accessories. We also supply mesh fences and a wide range of accessories such as feeders, drinkers, sheet metal nest for laying hens, with anti-crushing slide and egg tray. We create chicken coops, boxes and cages for family or professional use, suitable for housing various types of animals in a practical and hygienic way.

### **Products for birds and birds.**

We have a wide range of aviaries for numerous types of birds such as quail, pheasants, chickens, turtledoves, and even cages for parrots of various sizes. The aviaries are made of electro-welded mesh, with a galvanized sheet metal or tubular bearing structure, they can be expanded by adding more consecutive modules. We also create structures for poultry farming complete with accessories such as nests, sheet metal feeders and drinkers and terracotta sand bowls, as well as aviaries, customizable panels and doors.

### **Products for goats, sheep, pigs**

We manufacture boxes and shelters in sheet metal or insulating panels of medium and large dimensions, suitable for various types of birds, goats, sheep, pigs.
