DATA SHEET

Size	Materials	Indications
125 x 300 cm (doghouse 125x100x180h run 125x200x170h)	Roof in insulating panel with two slopes (single slope backwards on request); the living area can be with or without cover - the cover protrudes in all types of about 13-14 cm on three sides, while on the front it protrudes about 5 cm.	The boxes are designed for possible fixing to the ground: each panel and gate has an internal ring of 10 mm to be used for fixing on the concrete floor with 10 mm dowels, or on grassy ground with 10 mm pegs.
200 x 300 cm (doghouse 200x100x180h run 200x200x170h)		
200 x 400 cm (doghouse 200x100x180h run 200x300x170h)
